UNITED STATES SECURITIES AND EXCHANGE COMMISSION WASHINGTON, D.C. 20549

FORM 10-Q

 Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

 for the quarterly period ended March 31, 2019

□ Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the transition period from to

Commission File Number: 001-34058

or

CAPRICOR THERAPEUTICS, INC.

(Exact Name Of Registrant As Specified In Its Charter)

Delaware (State or other jurisdiction of incorporation or organization) 88-0363465 (I.R.S. Employer Identification No.)

8840 Wilshire Blvd., 2nd Floor, Beverly Hills, California 90211 (Address of principal executive offices including zip code)

(310) 358-3200

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. \square Yes \square No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (\$232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes \square No \square

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer \square Non-accelerated filer \blacksquare Accelerated filer \Box Smaller reporting company \blacksquare Emerging growth company \Box

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). 🗆 Yes 🗹 No

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class Common Stock, par value \$0.001 per share Trading Symbol(s) CAPR Name of Each Exchange on Which Registered The Nasdaq Capital Market

As of May 13, 2019, there were 34,675,234 shares of the registrant's common stock, par value \$0.001 per share, issued and outstanding.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which statements involve substantial risks and uncertainties. Forward-looking statements generally relate to future events or our future financial or operating performance. In some cases, you can identify forward-looking statements because they contain words such as "may," "will," "should," "expects," "plans," "anticipates," "could," "intends," "target," "projects," "contemplates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of these words or other similar terms or expressions that concern our expectations, strategy, plans or intentions. Forward-looking statements contained in this Quarterly Report on Form 10-Q include, but are not limited to, statements about:

- + the development of our drug candidates, including when we expect to undertake, initiate and complete clinical trials of our product candidates;
- expectation of or dates for commencement of clinical trials, investigational new drug filings and similar plans or projections;
- regulatory developments involving products, including the ability to obtain regulatory approvals or otherwise bring products to market;
- the regulatory approval of our drug candidates, including our ability to obtain and maintain orphan drug, rare pediatric and RMAT designations for our lead product candidate CAP-1002;
- our use of clinical research centers, third party manufacturers and other contractors;
- · our ability to find collaborative partners for research, development and commercialization of potential products;
- · our ability to manufacture products for clinical and commercial use;
- our ability to protect our patents and other intellectual property;
- our ability to market any of our products;
- · our projected operating losses;
- · the impact of taxes on our business;
- our ability to compete against other companies and research institutions;
- · our ability to expand our operations internationally;
- the effect of potential strategic transactions on our business;
- acceptance of our products by doctors, patients or payors and the availability of reimbursement for our product candidates;
- our ability to continue as a going concern;
- our ability to complete our clinical trials;
- · our ability to raise additional financing;
- · our ability to attract and retain key personnel; and
- the volatility of our stock price.

We caution you that the forward-looking statements highlighted above do not encompass all of the forward-looking statements made in this Quarterly Report on Form 10-Q.

You should not rely upon forward-looking statements as predictions of future events. We have based the forward-looking statements contained in this Quarterly Report on Form 10-Q primarily on our current expectations and projections about future events and trends that we believe may affect our business, financial condition, results of operations and prospects. The outcome of the events described in these forward-looking statements is subject to risks, uncertainties and other factors. Moreover, we operate in a very competitive and challenging environment. New risks and uncertainties emerge from time to time, and it is not possible for us to predict all risks and uncertainties that could have an impact on the forward-looking statements contained in this Quarterly Report on Form 10-Q. We cannot assure you that the results, events and circumstances reflected in the forward-looking statements will be achieved or occur, and actual results, events or circumstances could differ materially from those described in the forward-looking statements. Additionally, final data may differ significantly from preliminary data reported in this document.

The forward-looking statements made in this Quarterly Report on Form 10-Q relate only to events as of the date on which the statements are made. We undertake no obligation to update any forward-looking statements made in this Quarterly Report on Form 10-Q to reflect events or circumstances after the date of this Quarterly Report on Form 10-Q to reflect new information or the occurrence of unanticipated events, except as required by law. We may not actually achieve the plans, intentions or expectations disclosed in our forward-looking statements and you should not place undue reliance on our forward-looking statements. Our forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, joint ventures or investments we may make, if any.

This Quarterly Report on Form 10-Q also contains data, estimates and forecasts that are based on independent industry publications or other publicly available information, as well as other information based on our internal sources. Although we believe that the third-party sources referred to in this Quarterly Report on Form 10-Q are reliable, we have not independently verified the information provided by these third parties. While we are not aware of any misstatements regarding any third-party information presented in this report, their estimates, in particular, as they relate to projections, involve numerous assumptions, are subject to risks and uncertainties, and are subject to change based on various factors.

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Description of Business

Capricor Therapeutics, Inc., a Delaware corporation (referred to herein as "Capricor Therapeutics" or the "Company"), is a clinical-stage biotechnology company focused on the discovery, development and commercialization of innovative cell and exosome-based therapies for the treatment of diseases, with a focus on Duchenne muscular dystrophy ("DMD"), and other rare disorders. Capricor, Inc. ("Capricor"), a wholly-owned subsidiary of Capricor Therapeutics, was founded in 2005 as a Delaware corporation based on the innovative work of its founder, Eduardo Marbán, M.D., Ph.D. After completion of a merger between Capricor and a subsidiary of Nile Therapeutics, Inc., a Delaware corporation ("Nile"), on November 20, 2013, Capricor became a wholly-owned subsidiary of Nile and Nile formally changed its name to Capricor Therapeutics, Inc. Capricor Therapeutics, together with its subsidiary, Capricor, have four drug candidates, two of which are in various stages of active development.

Basis of Presentation

The accompanying unaudited interim condensed consolidated financial statements for Capricor Therapeutics and its wholly-owned subsidiary have been prepared in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP") and with the instructions to Form 10-Q and, therefore, do not include all disclosures necessary for a complete presentation of financial position, results of operations and cash flows in conformity with U.S. GAAP. In the Company's opinion, all adjustments, consisting of normal and recurring adjustments, considered necessary for a fair presentation have been included. The accompanying financial information should be read in conjunction with the financial statements and the notes thereto in the Company's most recent Annual Report on Form 10-K/A filed with the SEC on April 1, 2019, from which the December 31, 2018 consolidated balance sheet has been derived. Interim results are not necessarily indicative of the results that may be expected for the year ending December 31, 2019.

Basis of Consolidation

Our condensed consolidated financial statements include the accounts of the Company and our wholly-owned subsidiary. All intercompany transactions have been eliminated in consolidation.

Liquidity 1 -

The Company has historically financed its research and development activities as well as operational expenses from equity financings, government grants, a payment from Janssen Biotech, Inc. ("Janssen") pursuant to a Collaboration Agreement with Janssen and a loan award and a grant from the California Institute for Regenerative Medicine ("CIRM").

Cash, cash equivalents and marketable securities as of March 31, 2019 were approximately \$7.2 million, compared to approximately \$7.3 million as of December 31, 2018. On October 19, 2017, the Company entered into a Common Stock Sales Agreement (the "Sales Agreement") with H.C. Wainwright & Co. LLC ("Wainwright") to create an at-the-market equity program under which the Company from time to time offered and sold shares of its common stock, par value \$0.001 per share, having an aggregate offering price of up to \$14.0 million (the "ATM Program") through Wainwright, as sales agent. The Company sold an aggregate of 8,992,331 common shares under the ATM Program at an average price of \$1.30 per common share for net proceeds of approximately \$11.4 million (see Note 2 - "Stockholders' Equity" and Note 9 – "Subsequent Events"). The ATM Program expired on April 23, 2019.

The Company has been awarded various grant and loan awards, which fund, in part, various pre-clinical and clinical activities (see Note 5 – "Government Grant Awards"). As of March 31, 2019, the Company has approximately \$0.6 million remaining available under its grants and awards for disbursement, pursuant to the terms of the awards.

The Company's principal uses of cash are for research and development expenses, general and administrative expenses, capital expenditures and other working capital requirements.

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The Company's future expenditures and capital requirements may be substantial and will depend on many factors, including, but not limited to, the following:

- the timing and costs associated with its clinical trials and pre-clinical studies;
- the timing and costs associated with the manufacturing of its product candidates;
- · the timing and costs associated with commercialization of its product candidates;
- · the number and scope of its research programs; and
- the costs involved in prosecuting and enforcing patent claims and other intellectual property rights.

Based on the Company's current estimates and largely dependent on our decisions with respect to our HOPE-2 clinical trial, the Company believes it has sufficient cash to fund operations into the fourth quarter of 2019. In the first quarter of 2019, Capricor made certain operational adjustments to further reduce expenses by slowing down certain R&D efforts, decreasing headcount, and implementing further budget restrictions in order to preserve cash resources further. Based on the Company's available cash resources, the Company does not have sufficient cash on hand to support current operations for at least the next twelve months from the date of filing this Report on Form 10-Q. Therefore, there is substantial doubt about the Company's ability to continue as a going concern.

The Company's plan to address its financial position may include potentially seeking additional financing primarily from, but not limited to, the sale and issuance of equity or debt securities, the licensing or sale of its technology and other assets, and from government grants. The accompanying condensed consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and satisfaction of liabilities in the ordinary course of business. The condensed consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might result from the outcome of this uncertainty.

The Company will require substantial additional capital to fund operations. The Company cannot provide assurances that financing will be available when and as needed or that, if available, financing will be available on favorable or acceptable terms. If the Company is unable to obtain additional financing when and if required, it would have a material adverse effect on the Company's business and results of operations. The Company would likely need to delay, or curtail or terminate all or portions of its clinical trial programs. To the extent the Company issues additional equity securities, its existing stockholders would experience substantial dilution.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements. Estimates also affect the reported amounts of revenues and expenses during the reporting period. The most sensitive estimates relate to the recoverability and fair value of intangible assets and the assumptions used to estimate stock-based compensation expense. Management uses its historical records and knowledge of its business in making these estimates. Accordingly, actual results may differ from these estimates.

Cash, Cash Equivalents, and Restricted Cash

The Company considers all highly liquid investments with a maturity of three months or less at the date of purchase to be cash equivalents.

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The following table provides a reconciliation of cash, cash equivalents, and restricted cash reported within the condensed consolidated balance sheets that total the same such amounts shown in the condensed consolidated statements of cash flows.

	Ν	March 31, 2019	I	March 31, 2018
Cash and cash equivalents	\$	7,170,220	\$	7,169,262
Restricted cash		185,223		619,427
Total cash, cash equivalents, and restricted cash shown in the statements of cash flows	\$	7,355,443	\$	7,788,689

For the three months ended March 31, 2019 and 2018, restricted cash represents funds received under a CIRM award (the "CIRM Award") (see Note 5 – "Government Grant Awards"). Restricted cash funds are to be allocated to the research costs as incurred. Generally, a reduction of restricted cash occurs when the Company deems certain costs are attributable to the respective award. The restricted cash balance was approximately \$0.2 million and \$0.3 million as of March 31, 2019 and December 31, 2018, respectively.

Marketable Securities

The Company determines the appropriate classification of its marketable securities at the time of purchase and reevaluates such designation at each balance sheet date. All of the Company's marketable securities are considered as available-for-sale and carried at estimated fair values. Realized gains and losses on the sale of debt and equity securities are determined using the specific identification method. Unrealized gains and losses on available-for-sale securities are excluded from net income (loss) and reported in accumulated other comprehensive income (loss) as a separate component of stockholders' equity.

Property and Equipment

Property and equipment are stated at cost. Repairs and maintenance costs are expensed in the period incurred. Depreciation is computed using the straight-line method over the related estimated useful life of the asset, which such estimated useful lives range from five to seven years. Leasehold improvements are depreciated on a straight-line basis over the shorter of the useful life of the asset or the lease term. Depreciation was \$32,476 and \$23,241 for the three months ended March 31, 2019 and 2018, respectively.

Property and equipment consisted of the following as of March 31, 2019 and December 31, 2018:

	Mar	ch 31, 2019	46,709 \$ 46 936,480 936 47,043 47	
Furniture and fixtures	\$	46,709	\$	46,709
Laboratory equipment		936,480		936,480
Leasehold improvements		47,043		47,043
		1,030,232		1,030,232
Less accumulated depreciation		(488,502)		(456,026)
Property and equipment, net	\$	541,730	\$	574,206

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Intangible Assets

Amounts attributable to intellectual property consist primarily of the costs associated with the acquisition of certain technologies, patents, pending patents and related intangible assets with respect to research and development activities. Certain intellectual property assets are stated at cost and are amortized on a straight-line basis over the respective estimated useful lives of the assets ranging from five to fifteen years. Total amortization expense was \$10,819 for both the three months ended March 31, 2019 and 2018. A summary of future amortization expense as of March 31, 2019 is as follows:

Years ended	Amortization Expense
2019 (9 months)	32,457
2020	4,330
2021	2,165

The Company reviews goodwill and intangible assets at least annually for possible impairment. Goodwill and intangible assets are reviewed for possible impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of the reporting unit below its carrying value. No impairment was recorded for the three months ended March 31, 2019 and 2018.

Revenue Recognition

For contracts completed as of December 31, 2017, revenue was recognized in accordance with ASC 605 and other superseded standards. The company applied ASU 606 using the modified retrospective approach for all contracts in process as of January 1, 2018.

Government Research Grants

Generally, government research grants that provide funding for research and development activities are recognized as income when the related expenses are incurred, as applicable. Because the terms of the CIRM Award allow Capricor to elect to convert the grant into a loan after the end of the project period, the CIRM Award is being classified as a liability rather than income (see Note 5 - "Government Grant Awards"). Grant income is due upon submission of reimbursement request. The transaction price varies for grant income based on the expenses incurred under the awards.

Miscellaneous Income

Revenue is recognized in connection with the delivery of doses which were developed as part of our past R&D efforts. Income is recorded when the Company has satisfied the obligations as identified in the contracts with the customer (see Note 8 -"Related Party Transactions"). Miscellaneous income is due upon billing. Miscellaneous income is based on contracts with fixed transaction prices.

Rent

Rent expense for the Company's leases, which generally have escalating rental amounts over the term of the lease, is recorded on a straight-line basis over the lease term. The difference between the rent expense and rent paid has been recorded as deferred rent in the consolidated balance sheet under accounts payable and accrued expenses. Rent is amortized on a straight-line basis over the term of the applicable lease, without consideration of renewal options.

Research and Development

Costs relating to the design and development of new products are expensed as research and development as incurred in accordance with FASB ASC 730-10, Research and Development. Research and development costs amounted to approximately \$1.8 million and \$2.7 million for the three months ended March 31, 2019 and 2018, respectively.

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Comprehensive Income (Loss)

Comprehensive income (loss) generally represents all changes in stockholders' equity during the period except those resulting from investments by, or distributions to, stockholders. The Company's comprehensive loss was approximately \$2.5 million and \$3.7 million for the three months ended March 31, 2019 and 2018, respectively. The Company's other comprehensive income (loss) is related to a net unrealized gain (loss) on marketable securities. For the three months ended March 31, 2019 and 2018, the Company's other comprehensive gain (loss) was \$(12,393) and \$8,709, respectively.

Stock-Based Compensation

The Company accounts for stock-based employee compensation arrangements in accordance with guidance issued by the FASB, which requires the measurement and recognition of compensation expense for all share-based payment awards made to employees, consultants, and directors based on estimated fair values.

The Company estimates the fair value of stock-based compensation awards on the date of grant using an option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as an expense over the requisite service periods in the Company's statements of operations. The Company estimates the fair value of stock-based compensation awards using the Black-Scholes model. This model requires the Company to estimate the expected volatility and value of its common stock and the expected term of the stock options, all of which are highly complex and subjective variables. The variables take into consideration, among other things, actual and projected stock option exercise behavior. For employees and directors, the expected life was calculated based on the simplified method as described by the SEC Staff Accounting Bulletin No. 110, Share-Based Payment. For other service providers, the expected life was calculated using the contractual term of the award. The Company's estimate of expected volatility was based on the historical stock price of the Company. The Company has selected a risk-free rate based on the implied yield available on U.S. Treasury securities with a maturity equivalent to the expected term of the options.

Loss per Share

The Company reports earnings per share in accordance with FSAB ASC 260-10, *Earnings per Share*. Basic earnings (loss) per share is computed by dividing income (loss) available to common shareholders by the weighted-average number of common shares outstanding during the period. Diluted earnings (loss) per share is computed similarly to basic earnings (loss) per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive.

For the three months ended March 31, 2019 and 2018, warrants and options to purchase were 6,476,034 and 8,077,236 shares of common stock, respectively, which have been excluded from the computation of potentially dilutive securities. Dilutive potential common shares, which primarily consist of stock options issued to employees, consultants, and directors as well as warrants issued, have been excluded from the diluted loss per share calculation because their effect is anti-dilutive.

Fair Value Measurements

Assets and liabilities recorded at fair value in the balance sheet are categorized based upon the level of judgment associated with the inputs used to measure their fair value. The categories are as follows:

Level Input:	Input Definition:
Level I	Inputs are unadjusted, quoted prices for identical assets or liabilities in active markets at the measurement date.
Level II	Inputs, other than quoted prices included in Level I, that are observable for the asset or liability through corroboration with market data at
	the measurement date.
Level III	Unobservable inputs that reflect management's best estimate of what market participants would use in pricing the asset or liability at the
	measurement date.

1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The following tables summarize the fair value measurements by level for assets and liabilities measured at fair value on a recurring basis:

	December 31, 2018					
	Level I	Level II	Level III	Total		
Marketable Securities	\$ 2,997,150	\$ -	\$ -	\$ 2,997,150		

Carrying amounts reported in the balance sheet of cash and cash equivalents, grants receivable, accounts payable and accrued expenses approximate fair value due to their relatively short maturity. The carrying amounts of the Company's marketable securities are based on market quotations from national exchanges at the balance sheet date. Interest and dividend income are recognized separately on the income statement based on classifications provided by the brokerage firm holding the investments. The fair value of borrowings is not considered to be significantly different from its carrying amount because the stated rates for such debt reflect current market rates and conditions.

Recent Accounting Pronouncements

In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)* ("ASU 2016-02"), which supersedes existing guidance on accounting for leases in *Leases (Topic 840)* and issued additional clarification throughout 2018. Under the new guidance, a lesse should recognize assets and liabilities that arise from its leases and disclose qualitative and quantitative information about its leasing arrangements. The Company elected the optional transition method to apply the standard as of January 1, 2019 as the effective date and therefore, did not apply the standard to comparative periods. The Company did not apply the recognition requirements to short-term leases and recognized those lease payments in the Consolidated Statements of Operations on a straight-line basis over the lease term. The Company also elected the available package of practical expedients in transition which allowed us to not re-assess whether existing or expired arrangements contain a lease, the lease classification of existing or expired leases, or whether previous initial direct costs would qualify for capitalization under the new lease standard. The adoption of this update did not have a material impact on the Company's financial statements.

In June 2018, the FASB issued ASU 2018-07, Compensation – Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting, which simplifies several aspects of the accounting for nonemployee share-based payment transactions resulting from expanding the scope of Topic 718 to include share-based payment transactions for acquiring goods and services from nonemployees. The Company early adopted ASU 2018-07 and all subsequent updates related to this topic on a prospective basis effective July 1, 2018. The adoption of this update did not have a material impact on the Company's financial statements.

In November 2018, the FASB issued ASU 2018-18, *Collaborative Arrangements (Topic 808):* clarifying the interaction between Topic 808 and Topic 606. The amendments in the update clarifies that certain transactions between collaborative arrangement participants should be accounted for as revenue under Topic 606 when the collaborative arrangement participant is a customer in the context of a unit of account; adds unit-of-account guidance in Topic 808 to align with the guidance in Topic 606 when an entity is assessing whether the collaborative arrangement or a party of the arrangement is within the scope of Topic 606; requires that in a transaction with a collaborative arrangement participant that is not directly related to sales to third parties, presenting the transaction together with revenue recognized under Topic 606 is precluded if the collaborative arrangement participant is not a customer. The amendments for this update are effective for fiscal years beginning after December 15, 2019, and interim periods within those fiscal years. Early adoption is permitted. The Company is currently evaluating the impact of the new guidance on our consolidated financial statements.

Other recent accounting pronouncements issued by the FASB, including its Emerging Issues Task Force, the American Institute of Certified Public Accountants, and the SEC, did not or are not believed by management to have a material impact on the Company's present or future consolidated financial statement presentation or disclosures.

2. STOCKHOLDER'S EQUITY

Common Stock Sales Agreement

On October 19, 2017, the Company entered into the Sales Agreement with Wainwright, establishing the ATM Program. The common stock sold in the ATM Program was distributed at the market prices prevailing at the time of sale. The Sales Agreement provided that Wainwright would be entitled to compensation for its services at a commission rate of 3.0% of the gross sales price per share of common stock sold plus reimbursement of certain expenses. From inception through expiration of the ATM Program on April 23, 2019, the Company sold an aggregate of 8,992,331 shares at an average price of approximately \$1.30 per common share for net proceeds of approximately \$11.4 million (see Note 9 - "Subsequent Events"). The Company paid 3.0% cash commission on the gross proceeds, plus reimbursement of expenses of the placement agent and legal fees in the aggregate amount of approximately \$0.4 million.

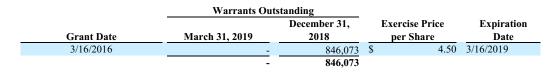

Outstanding Shares

At March 31, 2019, the Company had 33,661,346 shares of common stock issued and outstanding.

3. STOCK AWARDS, WARRANTS AND OPTIONS

Warrants

The following table summarizes all outstanding warrants to purchase shares of the Company's common stock:

Stock Options

The Company's Board of Directors (the "Board") has approved three stock option plans: (i) the 2006 Stock Option Plan, (ii) the 2012 Restated Equity Incentive Plan (which superseded the 2006 Stock Option Plan) (the "2012 Plan"), and (iii) the 2012 Non-Employee Director Stock Option Plan (the "2012 Non-Employee Director Plan").

At the time the merger between Capricor and Nile became effective, 4,149,710 shares of common stock were reserved under the 2012 Plan for the issuance of stock options, stock appreciation rights, restricted stock awards and performance unit/share awards to employees, consultants and other service providers. Included in the 2012 Plan are the shares of common stock that were originally reserved under the 2006 Stock Option Plan. Under the 2012 Plan, each stock option granted will be designated in the award agreement as either an incentive stock option or a nonstatutory stock option. Notwithstanding such designation, however, to the extent that the aggregate fair market value of the shares with respect to which incentive stock options are exercisable for the first time by the participant during any calendar year (under all plans of the Company and any parent or subsidiary) exceeds \$100,000, such options will be treated as nonstatutory stock options.

On June 2, 2016 at the Company's annual stockholder meeting, the stockholders approved a proposal to amend the 2012 Plan, to, among other things, increase the number of shares of common stock of the Company that may be issued under the 2012 Plan to equal the sum of 4,149,710 plus 2% of the outstanding shares of common stock as of December 31, 2015, with the number of shares that may be issued under the 2012 Plan automatically increasing thereafter on January 1 of each year, commencing with January 1, 2017, by 2% of the outstanding shares of common stock as of the last day of the immediately preceding fiscal year (rounded down to the nearest whole share). Additionally, in connection with the proposed increase in the total number of shares of common stock that may be issued under the 2012 Plan at eintended to qualify as incentive stock options from 4,149,710 shares to 4,474,809 shares. The Third Amendment to the 2012 Plan provided that an additional 325,099 shares be added to the 2012 Plan for the fiscal year 2016. In addition, for the fiscal years beginning on January 1, 2019 and 2018, the amount of shares that were added was equal to 627,754 and 525,409 shares, respectively.

3. STOCK AWARDS, WARRANTS AND OPTIONS (Continued)

At the time the merger between Capricor and Nile became effective, 2,697,311 shares of common stock were reserved under the 2012 Non-Employee Director Plan for the issuance of stock options to members of the Board who are not employees of the Company.

Each of the Company's stock option plans are administered by the Board, or a committee appointed by the Board, which determines the recipients and types of awards to be granted, as well as the number of shares subject to the awards, the exercise price and the vesting schedule. Currently, stock options are granted with an exercise price equal to the closing price of the Company's common stock on the date of grant, and generally vest over a period of one to four years. The term of stock options granted under each of the plans cannot exceed ten years.

The estimated weighted average fair value of the options granted during the three months ended March 31, 2018 were approximately \$1.45 per shares. No options were granted during the three months ended March 31, 2019.

The Company estimates the fair value of each option award using the Black-Scholes option-pricing model. The Company used the following assumptions to estimate the fair value of stock options issued in the three months ended March 31, 2018 as no options were issued during the three months ended March 31, 2019:

	March 31, 2018
Expected volatility	142% - 145%
Expected term	5 - 6 years
Dividend yield	0%
Risk-free interest rates	2.3%

Employee and non-employee stock-based compensation expense for the three months ended March 31, 2019 and 2018 was as follows:

	1	Three months ended March 31,				
	_	2019		2018		
General and administrative	\$	177,511	\$	304,388		
Research and development		45,655		130,475		
Total	\$	223,166	\$	434,863		

The Company does not recognize an income tax benefit as the Company believes that an actual income tax benefit may not be realized. For non-qualified stock options, the loss creates a timing difference, resulting in a deferred tax asset, which is fully reserved by a valuation allowance.

Common stock, stock options or other equity instruments issued to non-employees (including consultants) as consideration for goods or services received by the Company are accounted for based on the fair value of the equity instruments issued. The fair value of stock options is determined using the Black-Scholes option-pricing model. Historically, the Company periodically re-measured the fair value for non-qualified option grants recording an expense over the applicable vesting periods. However, in the third quarter of 2018, the Company early adopted ASU 2018-07. The Company calculates the fair value for non-qualified options as of the date of grant and expenses over the applicable vesting periods. We account for estimated forfeitures at the date of grant.

1	5
1	2

3. STOCK AWARDS, WARRANTS AND OPTIONS (Continued)

The following is a schedule summarizing employee and non-employee stock option activity for the three months ended March 31, 2019:

	Number of Options	Weighted Average Exercise Price	Aggregate Intrinsic Value
Outstanding at January 1, 2019	7,013,140	\$ 1.62	
Granted	-	-	
Exercised	-	-	
Expired/Cancelled	(537,106)	2.78	
Outstanding at March 31, 2019	6,476,034	\$ 1.52	\$ 445,536
Exercisable at March 31, 2019	5,768,223	\$ 1.47	\$ 445,536

The aggregate intrinsic value represents the difference between the exercise price of the options and the estimated fair value of the Company's common stock for each of the respective periods.

The aggregate intrinsic value of options exercised was zero and \$521,678 for the three months ended March 31, 2019 and 2018, respectively.

4. CONCENTRATIONS

Cash Concentration

The Company has historically maintained checking accounts at two financial institutions. These accounts are each insured by the Federal Deposit Insurance Corporation for up to \$250,000. Historically, the Company has not experienced any significant losses in such accounts and believes it is not exposed to any significant credit risk on cash, cash equivalents and marketable securities. As of March 31, 2019, the Company maintained approximately \$7.1 million of uninsured deposits.

5. GOVERNMENT GRANT AWARDS

CIRM Grant Award (HOPE)

On June 16, 2016, Capricor entered into the CIRM Award with CIRM in the amount of approximately \$3.4 million to fund, in part, Capricor's Phase I/II HOPE-Duchenne clinical trial investigating CAP-1002 for the treatment of Duchenne muscular dystrophy-associated cardiomyopathy. Pursuant to terms of the CIRM Award, the disbursements were tied to the achievement of specified operational milestones. If CIRM determines, in its sole discretion, that Capricor has not complied with the terms and conditions of the CIRM Award, CIRM may suspend or permanently cease disbursements or pursue other remedies as allowed by law. In addition, the terms of the CIRM Award include a co-funding requirement pursuant to which Capricor is required to spend approximately \$2.3 million of its own capital to fund the CIRM funded research project. If Capricor fails to satisfy its co-funding requirement, the amount of the CIRM Award may be proportionately reduced. The CIRM Award is further subject to the conditions and requirements set forth in the CIRM Grants Administration Policy for Clinical Stage Projects. Such requirements include, without limitation, the filing of quarterly and annual reports with CIRM, the sharing of intellectual property pursuant to Title 17, California Code of Regulations (CCR) Sections 100600-100612, and the sharing with the State of California of a fraction of licensing revenue received from a CIRM funded research project and net commercial revenue from a commercialized product which resulted from the CIRM funded research as set forth in Title 17, CCR Section 100608. The maximum royalty on net commercial revenue that Capricor may be required to pay to CIRM is equal to nine times the total amount awarded and paid to Capricor.

5. GOVERNMENT GRANT AWARDS (Continued)

After completing the CIRM funded research project and after the award period end date, estimated to be in 2019, Capricor has the right to convert the CIRM Award into a loan, the terms of which will be determined based on various factors, including the stage of the research and development of the program at the time the election is made. On June 20, 2016, Capricor entered into a Loan Election Agreement with CIRM whereby, among other things, CIRM and Capricor agreed that if Capricor elects to convert the grant into a loan, the term of the loan would be five years from the date of execution of the applicable loan agreement; provided that the term of the loan will not exceed ten years from the date on which the CIRM Award was granted. Beginning on the date of the loan, the loan shall bear interest on the unpaid principal balance, plus the interest that has accrued prior to the election point according to the terms set forth in CIRM's Loan Policy (the "New Loan Balance"), at a per annum rate equal to the LIBOR rate for a three-month deposit in U.S. dollars, as published by the Wall Street Journal on the loan date, plus one percent. Interest shall be compounded annually on the outstanding New Loan Balance commencing with the loan date and the interest shall be payable, together with the New Loan Balance, upon the due date of the loan. If Capricor elects to convert the CIRM Award into a loan, cretain requirements of the CIRM Award will no longer be applicable, including the revenue sharing requirements. Capricor has not yet made its decision as to whether it will elect to convert the CIRM Award will no longer.

In 2016, Capricor received \$3.1 million under the terms of the CIRM Award. In September 2017, the Company completed the second operational milestone tied to the last patient completing one year of follow-up, for which approximately \$0.3 million was received by Capricor in November 2017. As of March 31, 2019, the Company's liability balance for the CIRM Award was \$3.4 million, of which approximately \$0.2 million is recorded as restricted cash, due to the fact that Capricor is required to expend approved project costs in order to use these funds.

On August 8, 2017, the Company entered into an Amendment to the CIRM Notice of Award pursuant to which CIRM approved the Company's request to use the remaining estimated project funds of the CIRM Award for technology transfer activities in support of the manufacture of CAP-1002 to a designated contract manufacturing organization ("CMO") which will help enable Capricor to offer access to CAP-1002 to patients from the control arm of the HOPE-Duchenne trial via an open-label extension protocol. On September 7, 2018, the Company entered into an Amendment to the CIRM Notice of Award pursuant to which CIRM added an additional operational milestone which would be satisfied by completion of certain activities related to technology transfer. On January 23, 2019, the Company entered into an Amendment to the CIRM Notice of Award pursuant to which CIRM added an additional operational milestone which would be satisfied by completion of certain activities related to technology transfer. On January 23, 2019, the Company entered into an Amendment to the CIRM Notice of Award pursuant to which CIRM added an additional operational milestone which would be satisfied by completion of certain activities related to technology transfer.

NIH Grant Award (HLHS)

In September 2016, Capricor was approved for a grant from the NIH to study CAP-2003 (cardiosphere-derived cell exosomes) for hypoplastic left heart syndrome (HLHS). Under the terms of the NIH grant, disbursements will be made to Capricor in an amount up to approximately \$4.2 million, subject to annual and quarterly reporting requirements as well as completion of the study objectives. As of March 31, 2019, approximately \$0.7 million has been incurred under the terms of the NIH grant award. At this time, the Company is in the process of closing out this grant award, subject to completing customary close-out documentation with no additional expenses expected to be incurred.

U.S. Department of Defense Grant Award

In September 2016, Capricor was approved for a grant award from the Department of Defense in the amount of approximately \$2.4 million to be used toward developing a scalable, commercially-ready process to manufacture CAP-2003. Under the terms of the award, disbursements will be made to Capricor over a period of approximately three years, subject to annual and quarterly reporting requirements. As of March 31, 2019, approximately \$1.8 million has been incurred under the terms of the award.

6. COMMITMENTS AND CONTINGENCIES

Leases

Capricor leases space for its corporate offices pursuant to a lease that was originally effective for a two-year period beginning July 1, 2013 with an option to extend the lease for an additional twelve months. On May 25, 2016, Capricor entered into a Third Amendment to Lease (the "Third Lease Amendment") with The Bubble Real Estate Company, LLC. Under the terms of the Third Lease Amendment, the lease term extension commenced on July 1, 2016 and was to end on December 31, 2018. The base rent increased to \$22,995 per month for the first twelve months of the term, commencing July 1, 2016, increased to \$23,915 per month for the second twelve months of the term, commencing July 1, 2016, increased to \$23,915 per month for the second twelve months of the term, commencing July 1, 2017, and, thereafter, increased to \$24,872 per month for the remainder of the lease term, commencing July 1, 2018. On January 11, 2019, Capricor entered into a Fourth Amendment to Lease (the "Fourth Lease Amendment") with The Bubble Real Estate Company, LLC. Under the terms of the Fourth Lease Amendment, the lease term extension commenced on January 1, 2019, and will end on December 31, 2019 with a base rent of \$25,867 per month. Effective April 1, 2019, the Company has agreed to deliver to the landlord an unconditional, irrevocable, transferrable letter of credit in the amount of \$232,803 to cover payments of rent for the remainder of the lease term.

The Facilities Lease which Capricor entered into with CSMC is for a term of three years commencing June 1, 2014 and replaced the month-to-month lease that was previously in effect between CSMC and Capricor. The monthly lease payment under the Facilities Lease was \$15,461 per month for the first six months of the term and increased to \$19,350 per month for the remainder of the term. The amount of rent expense is subject to annual adjustments according to increases in the Consumer Price Index. The Facilities Lease expired on May 31, 2017 and transitioned to a month-to-month tenancy. On August 10, 2017, the Company and CSMC entered into the First Amendment to the Facilities Lease effective August 1, 2017 (the "First Amendment") pursuant to which the term of the Facilities Lease was extended for an additional 12-month period, and the Company was granted an option to further extend the term for an additional 12-month period thereafter through July 31, 2019. Under the First Amendment, the total monthly rent increased from \$19,350 to \$19,756. In addition, pursuant to the First Amendment, the premises covered by the Facilities Lease now also include the manufacturing facility currently being utilized by Capricor. In lieu of further increasing the monthly rental payment set forth in the First Amendment, the Company has also agreed to provide doses of CAP-1002 for use in CSMC's clinical trials for a negotiated amount of monetary compensation. On July 19, 2018, the Company exercised its option to extend the term of the Facilities Lease pursuant to which Capricor was granted two consecutive 1-year options to extend the term of the Facilities Lease pursuant to which Capricor was granted two consecutive 1-year options to extend the term of the Facilities Lease through July 31, 2021. Capricor entered into a Third Amendment to the CSMC Facilities Lease reducing the square footage of the leased premises, which resulted in a rent reduction of approximately \$4,000 per month which became effective March 1, 2019.

In addition, the Company entered into a month-to-month lease agreement with University Center Lane Tenant, LLC, pursuant to which the Company leased office space located in San Diego, California. The lease commenced March 1, 2018 and the rental payment was \$4,190 per month. The Company terminated the lease effective February 28, 2019.

Unless renewed, each of the leases described above will not be in effect for fiscal year 2020. Included within the table below, future minimum rental payments to related parties totaled approximately \$63,220. A summary of future minimum rental payments required under operating leases as of March 31, 2019 is as follows:

Years ended	Opera	ating Leases
2019 (9 months)	\$	296,023

Expenses incurred under operating leases to unrelated parties for the three months ended March 31, 2019 and 2018 were \$84,601 and \$77,264, respectively. Expenses incurred under operating leases to related parties for each of the three months ended March 31, 2019 and 2018 were \$55,317 and \$59,268, respectively.

Legal Contingencies

The Company is not a party to any material legal proceedings at this time. From time to time, the Company may become involved in various legal proceedings that arise in the ordinary course of its business or otherwise.

6. COMMITMENTS AND CONTINGENCIES (Continued)

Accounts Payable

Over the normal course of business, disputes with vendors may arise. If a vendor dispute payment is probable and able to be estimated, we will record an estimated liability.

Employee Severances

In the first quarter of 2019, the Board of Directors approved severance packages for all current full-time employees based on length of service and position ranging up to six months of their base salaries subject to certain conditions. No liability has been recorded as of March 31, 2019.

7. LICENSE AGREEMENTS

Capricor's Technology - CAP-1002, CAP-1001, CSps and Exosomes

Capricor has entered into exclusive license agreements for intellectual property rights related to certain cardiac-derived cells with Università Degli Studi Di Roma La Sapienza (the "University of Rome"), The Johns Hopkins University ("JHU") and CSMC. In addition, Capricor has filed patent applications related to the technology developed by its own scientists.

University of Rome License Agreement

Capricor and the University of Rome entered into a License Agreement, dated June 21, 2006 (the "Rome License Agreement"), which provides for the grant of an exclusive, world-wide, royalty-bearing license by the University of Rome to Capricor (with the right to sublicense) to develop and commercialize licensed products under the licensed patent rights in all fields. Capricor has a right of first negotiation, for a certain period of time, to obtain a license to any new and separate patent applications owned by the University of Rome utilizing cardiac stem cells in cardiac care.

Pursuant to the Rome License Agreement, Capricor paid the University of Rome a license issue fee, is currently paying minimum annual royalties in the amount of 20,000 Euros per year, and is obligated to pay a lower-end of a mid-range double-digit percentage on all royalties received as a result of sublicenses granted, which are net of any royalties paid to third parties under a license agreement from such third party to Capricor. The minimum annual royalties are creditable against future royalty payments.

The Rome License Agreement will, unless extended or sooner terminated, remain in effect until the later of the last claim of any patent or until any patent application comprising licensed patent rights has expired or been abandoned. Under the terms of the Rome License Agreement, either party may terminate the agreement should the other party become insolvent or file a petition in bankruptcy. Either party may terminate the agreement upon the other party's material breach, provided that the breaching party will have up to 90 days to cure its material breach. Capricor may also terminate for any reason upon 90 days' written notice to the University of Rome.

The Johns Hopkins University License Agreement

Capricor and JHU entered into an Exclusive License Agreement, effective June 22, 2006 (the "JHU License Agreement"), which provides for the grant of an exclusive, world-wide, royalty-bearing license by JHU to Capricor (with the right to sublicense) to develop and commercialize licensed products and licensed services under the licensed patent rights in all fields and a nonexclusive right to the know-how. In May 2009, the JHU License Agreement was amended to add additional patent rights to the JHU License Agreement in consideration of a payment to JHU and reimbursement of patent costs. Capricor and JHU executed a Second Amendment to the JHU License Agreement, effective as of December 20, 2013, pursuant to which, among other things, certain definitions were added or amended, the timing of certain obligations was revised and other obligations of the parties were clarified. Under the JHU License Agreement, Capricor is required to exercise commercially reasonable and diligent efforts to develop and commercialize licensed products covered by the licenses from JHU.

7. LICENSE AGREEMENTS (Continued)

Pursuant to the JHU License Agreement, JHU was paid an initial license fee and, thereafter, Capricor is required to pay minimum annual royalties on the anniversary dates of the JHU License Agreement. The minimum annual royalties range from \$5,000 on the first and second anniversary dates to \$20,000 on the tenth anniversary date and thereafter. The minimum annual royalties are creditable against a low single-digit running royalty on net sales of products and net service revenues, which Capricor is also required to pay under the JHU License Agreement, which running royalty may be subject to further reduction in the event that Capricor is required to pay royalties on any patent rights to third parties in order to make or sell a licensed product. In addition, Capricor is required to pay a low double-digit percentage of the consideration received by it from sublicenses granted, and is required to pay JHU certain defined development milestone payments upon the successful completion of a full Phase I clinical studies and upon receiving approval from the FDA. The development milestones range from \$100,000 upon successful completion of a full Phase I clinical study to \$1,000,000 upon full FDA market approval and are fully creditable against payments owed by Capricor to JHU on account of sublicense consideration attributable to milestone payments received from a sublicense. The maximum aggregate amount of milestone payments payable under the JHU License Agreement, as amended, is \$1,850,000. In May 2015, Capricor paid the development milestone related to Phase I that was owed to JHU pursuant to the terms of the JHU License Agreement.

The JHU License Agreement will, unless sooner terminated, continue in effect in each applicable country until the date of expiration of the last to expire patent within the patent rights, or, if no patents are issued, then for twenty years from the effective date. Under the terms of the JHU License Agreement, either party may terminate the agreement should the other party become insolvent or file a petition in bankruptcy, or fail to cure a material breach within 30 days after notice. In addition, Capricor may terminate for any reason upon 60 days' written notice.

Cedars-Sinai Medical Center License Agreements

License Agreement for CDCs

On January 4, 2010, Capricor entered into an Exclusive License Agreement with CSMC (the "Original CSMC License Agreement") for certain intellectual property related to its CDC technology. In 2013, the Original CSMC License Agreement was amended twice resulting in, among other things, a reduction in the percentage of sublicense fees which would have been payable to CSMC. Effective December 30, 2013, Capricor entered into an Amended and Restated Exclusive License Agreement with CSMC (the "Amended CSMC License Agreement") which amended, restated, and superseded the Original CSMC License Agreement, pursuant to which, among other things, certain definitions were added or amended, the timing of certain obligations was revised and other obligations of the parties were clarified.

The Amended CSMC License Agreement provides for the grant of an exclusive, world-wide, royalty-bearing license by CSMC to Capricor (with the right to sublicense) to conduct research using the patent rights and know-how and develop and commercialize products in the field using the patent rights and know-how. In addition, Capricor has the exclusive right to negotiate for an exclusive license to any future rights arising from related work conducted by or under the direction of Dr. Eduardo Marbán on behalf of CSMC. In the event the parties fail to agree upon the terms of an exclusive license for any future rights, Capricor will have a non-exclusive license to such future rights, subject to royalty obligations.

Pursuant to the Original CSMC License Agreement, CSMC was paid a license fee and Capricor was obligated to reimburse CSMC for certain fees and costs incurred in connection with the prosecution of certain patent rights. Additionally, Capricor is required to meet certain spending and development milestones. The annual spending requirements ranged from \$350,000 to \$800,000 each year between 2010 and 2017 (with the exception of 2014, for which there was no annual spending requirement).

Pursuant to the Amended CSMC License Agreement, Capricor remains obligated to pay low single-digit royalties on sales of royalty-bearing products as well as a low double-digit percentage of the consideration received from any sublicenses or other grant of rights. The above-mentioned royalties are subject to reduction in the event Capricor becomes obligated to obtain a license from a third party for patent rights in connection with the royalty-bearing product. In 2010, Capricor discontinued its research under some of the patents.

7. LICENSE AGREEMENTS (Continued)

The Amended CSMC License Agreement will, unless sooner terminated, continue in effect on a country by country basis until the last to expire of the patents covering the patent rights or future patent rights. Under the terms of the Amended CSMC License Agreement, unless waived by CSMC, the agreement shall automatically terminate: (i) if Capricor ceases, dissolves or winds up its business operations; (ii) in the event of the insolvency or bankruptcy of Capricor or if Capricor makes an assignment for the benefit of its creditors; (iii) if performance by either party jeopardizes the licensure, accreditation or tax exempt status of CSMC or the agreement is deemed illegal by a governmental body; (iv) within 30 days for non-payment of royalties; (v) after 90 days' notice from CSMC if Capricor fails to undertake commercially reasonable efforts to exploit the patent rights or future patent rights; (vi) if a material breach has not been cured within 90 days; or (vii) if Capricor challenges any of the CSMC patent rights. If Capricor fails to undertake commercially reasonable efforts to exploit the patent rights to exploit the patent rights or future patent rights. CSMC has the option to convert any exclusive license to Capricor to a non-exclusive or co-exclusive license. Capricor may terminate the agreement if CSMC fails to cure any material breach within 90 days after notice.

On March 20, 2015, Capricor and CSMC entered into a First Amendment to the Amended CSMC License Agreement, pursuant to which the parties agreed to delete certain patent applications from the list of scheduled patents which Capricor determined not to be material to the portfolio.

On August 5, 2016, Capricor and CSMC entered into a Second Amendment to the Amended CSMC License Agreement (the "Second License Amendment"), pursuant to which the parties agreed to add certain patent applications to the schedule of patent rights set forth in the agreement. Under the Second License Amendment, (i) the description of scheduled patent rights has been replaced by a revised schedule that includes six additional patent applications; (ii) Capricor paid an upfront fee of \$2,500; and (iii) Capricor reimbursed CSMC approximately \$10,000 for attorneys' fees and filing fees that were incurred in connection with the additional patent applications.

On December 26, 2017, Capricor entered into a Third Amendment to the Amended CSMC License Agreement thereby amending the CDCs License (the "Third License Amendment"). Under the Third License Amendment, (i) the description of scheduled patent rights has been replaced by a revised schedule that includes seven additional patent applications; and (ii) Capricor is required to reimburse CSMC approximately \$50,000 for attorneys' fees and filing fees that were incurred in connection with the additional patent rights.

On June 20, 2018, Capricor and CSMC entered into a Fourth Amendment to the Amended CSMC License Agreement (the "Fourth License Amendment"). Under the Fourth License Amendment, the description of scheduled patent rights has been replaced by a revised schedule that includes two additional patent applications.

License Agreement for Exosomes

On May 5, 2014, Capricor entered into an Exclusive License Agreement with CSMC (the "Exosomes License Agreement"), for certain intellectual property rights related to exosomes technology. The Exosomes License Agreement provides for the grant of an exclusive, world-wide, royalty-bearing license by CSMC to Capricor (with the right to sublicense) in order to conduct research using the patent rights and know-how and to develop and commercialize products in the field using the patent rights and know-how. In addition, Capricor has the exclusive right to negotiate for an exclusive license to any future rights arising from related work conducted by or under the direction of Dr. Eduardo Marbán on behalf of CSMC. In the event the parties fail to agree upon the terms of an exclusive license, Capricor shall have a non-exclusive license to such future rights, subject to royalty obligations.

7. LICENSE AGREEMENTS (Continued)

Pursuant to the Exosomes License Agreement, CSMC was paid a license fee and Capricor reimbursed CSMC for certain fees and costs incurred in connection with the preparation and prosecution of certain patent applications. Additionally, Capricor is required to meet certain non-monetary development milestones and is obligated to pay low single-digit royalties on sales of royalty-bearing products as well as a single-digit percentage of the consideration received from any sublicenses or other grant of rights. The above-mentioned royalties are subject to reduction in the event Capricor becomes obligated to obtain a license from a third party for patent rights in connection with the royalty bearing product.

The Exosomes License Agreement will, unless sooner terminated, continue in effect on a country by country basis until the last to expire of the patents covering the patent rights or future patent rights. Under the terms of the Exosomes License Agreement, unless waived by CSMC, the agreement shall automatically terminate: (i) if Capricor ceases, dissolves or winds up its business operations; (ii) in the event of the insolvency or bankruptcy of Capricor or if Capricor makes an assignment for the benefit of its creditors; (iii) if performance by either party jeopardizes the licensure, accreditation or tax exempt status of CSMC or the agreement is deemed illegal by a governmental body; (iv) within 30 days for non-payment of royalties; (v) after 90 days if Capricor fails to undertake commercially reasonable efforts to exploit the patent rights or future patent rights, and fails to cure that breach after 90 days' notice from CSMC, instead of terminating the license, CSMC has the option to convert any exclusive license to Capricor to a non-exclusive or co-exclusive license. Capricor may terminate the agreement if CSMC fails to cure any material breach within 90 days after notice.

On February 27, 2015, Capricor and CSMC entered into a First Amendment to Exosomes License Agreement (the "First Exosomes License Amendment"). Under the First Exosomes License Amendment, (i) the description of scheduled patent rights has been replaced by a revised schedule that includes four additional patent applications; (ii) Capricor was required to pay CSMC an upfront fee of \$20,000; (iii) Capricor was required to reimburse CSMC approximately \$34,000 for attorneys' fees and filing fees that were incurred in connection with the additional patent rights; and (iv) Capricor is required to pay CSMC certain defined product development milestone payments upon reaching certain phases of its clinical studies and upon receiving approval for a product from the FDA. The product development milestones range from \$15,000 upon the dosing of the first patient in a Phase I clinical trial of a product to \$75,000 upon receipt of FDA approval for a product. The maximum aggregate amount of milestone payments payable under the Exosomes License Agreement, as amended, is \$190,000.

On June 10, 2015, Capricor and CSMC entered into a Second Amendment to Exosomes License Agreement, thereby amending the Exosomes License Agreement further to add an additional patent application to the Schedule of Patent Rights.

On August 5, 2016, Capricor and CSMC entered into a Third Amendment to the Exosomes License Agreement (the "Third Exosomes License Amendment"), pursuant to which the parties agreed to add certain patent applications to the schedule of patent rights under the agreement. Under the Third Exosomes License Amendment, (i) the description of scheduled patent rights has been replaced by a revised schedule that includes three additional patent applications; (ii) Capricor paid CSMC an upfront fee of \$2,500; and (iii) Capricor reimbursed CSMC approximately \$16,000 for attorneys' fees and filing fees that were incurred in connection with the additional patent applications.

On December 26, 2017, Capricor and CSMC entered into a Fourth Amendment to Exosomes License Agreement, thereby amending the Exosomes License (the "Fourth Exosomes License Amendment"). Under the Fourth Exosomes License Amendment, (i) the description of scheduled patent rights was replaced by a revised schedule that includes seven additional patent applications; (ii) Capricor is required to reimburse CSMC approximately \$50,000 for attorneys' fees and filing fees that were incurred in connection with the additional patent rights; and (iii) a schedule to the Exosomes License was modified to extend the milestone deadline for filing an IND for at least one product to December 31, 2018.

On June 20, 2018, Capricor and CSMC entered into a Fifth Amendment to the Exosomes License Agreement (the "Fifth License Amendment"). Under the Fifth License Amendment, (i) the description of scheduled patent rights has been replaced by a revised schedule that includes four additional patent applications; and (ii) Capricor is required to reimburse CSMC approximately \$27,000 for attorneys' fees and filing fees that were incurred in connection with the additional patent rights.

7. LICENSE AGREEMENTS (Continued)

On September 25, 2018, Capricor and CSMC entered into a Sixth Amendment to the Exosomes License Agreement (the "Sixth License Amendment"). Under the Sixth License Amendment, the milestone deadline for filing an IND for at least one product has been extended to December 31, 2019. If the Company does not file an IND by December 31, 2019, or negotiate an additional extension of the milestone deadline, CSMC would have the option to convert the exclusive license to a non-exclusive license or to a co-exclusive license or terminate the license under Title 35, Section 203 of the United States Code. Prior to exercising such option, Capricor has the opportunity to cure the failure to file an IND for a period of 90 days after its receipt of written notice from CSMC of its intent to exercise its option.

8. RELATED PARTY TRANSACTIONS

Lease and Sub-Lease Agreement

As noted above, Capricor is a party to lease agreements with CSMC, which holds more than 10% of the outstanding capital stock of Capricor Therapeutics (see Note 6 – "Commitments and Contingencies"), and CSMC has served as an investigative site in Capricor's clinical trials. Additionally, Dr. Eduardo Marbán, who holds approximately 9% of the outstanding capital stock of Capricor Therapeutics and participates as an observer at the Company's meetings of the Board of Directors, is the Director of the Cedars-Sinai Smidt Heart Institute, a co-founder of Capricor and the Chairman of the Company's Scientific Advisory Board.

On April 1, 2013, Capricor entered into a sublease with Reprise Technologies, LLC, a limited liability company which is wholly owned by Dr. Frank Litvack, the Company's Executive Chairman and member of its Board of Directors, for \$2,500 per month. The sublease is on a month-to-month basis. For each of the three months periods ended March 31, 2019 and 2018, Capricor recognized \$7,500 in sublease income from the related party. Sublease income is recorded as a reduction to general and administrative expenses.

Consulting Agreements

In 2013, Capricor entered into a Consulting Agreement with Dr. Frank Litvack, the Company's Executive Chairman and a member of its Board of Directors, whereby Capricor agreed to pay Dr. Litvack \$10,000 per month for consulting services. The agreement is terminable upon 30 days' notice. Additionally, beginning in 2016, Capricor retained the services of Lit Digital Media, LLC whose sole member is Harry Litvack, the son of Dr. Frank Litvack. Lit Digital Media provided services to the Company related to social media and public relations, and the Company paid Lit Digital Media approximately \$1,500 per month for such services. On January 31, 2019, we terminated the services of Lit Digital Media.

Payables to Related Party

At March 31, 2019 and December 31, 2018, the Company had accounts payable and accrued expenses to related parties totaling \$38,066 and \$106,366, respectively. CSMC accounts for \$27,973 and \$100,191 of the total accounts payable and accrued expenses to related parties as of March 31, 2019 and December 31, 2018, respectively. CSMC expenses relate to research and development and clinical trial costs. During the three months ended March 31, 2019 and 2018, the Company paid CSMC approximately \$100,000 and \$200,000, respectively, for such costs.

Related Party Clinical Trials

Capricor has agreed to provide cells for investigational purposes in two clinical trials sponsored by CSMC. These cells were developed as part of the Company's past research and development efforts. The first trial is known as "Regression of Fibrosis and Reversal of Diastolic Dysfunction in HFpEF Patients Treated with Allogeneic CDCs." Dr. Eduardo Marbán is the named principal investigator under the study. The second trial is known as "Pulmonary Arterial Hypertension treated with Cardiosphere-derived Allogeneic Stem Cells." In both studies, Capricor will provide the necessary number of doses of cells and will receive a negotiated amount of monetary compensation which is estimated to be approximately \$2.1 million over several years. For the three months ended March 31, 2019 and 2018, the Company recognized approximately \$108,000 and \$93,000, respectively, as revenue. As of March 31, 2019, and December 31, 2018, approximately \$45,000 and \$269,000, respectively, is outstanding and recorded in prepaid expenses and other current assets.

8. RELATED PARTY TRANSACTIONS (Continued)

Related Party Agreement

On May 10, 2018, Capricor and TrialTech Medical, Inc., a corporation in which Dr. Frank Litvack, our Executive Chairman and a director, is a co-founder, shareholder and chairman, entered into an agreement whereby TrialTech Medical, Inc. would provide clinical trial services to Capricor for its HOPE-2 clinical trial. In December 2018, Capricor ceased the use of those services. Total costs incurred under the agreement were approximately \$42,600.

9. SUBSEQUENT EVENTS

Common Stock Sales Agreement

Subsequent to March 31, 2019 and through the expiration of the ATM Program on April 23, 2019, the Company sold an aggregate of 1,005,590 common shares at an average price of approximately \$0.56 per common share for net proceeds of approximately \$0.5 million. The Company paid 3.0% cash commission on the gross proceeds, plus reimbursement of expenses of the placement agent in the aggregate amount of approximately \$18,900.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion of our financial condition and results of operations should be read in conjunction with the condensed consolidated financial statements and the condensed consolidated notes to those statements included elsewhere in this Quarterly Report on Form 10-Q. This discussion includes forward-looking statements that involve risks and uncertainties. As a result of many factors, our actual results may differ materially from those anticipated in these forward-looking statements.

As used in this Quarterly Report on Form 10-Q, references to "Capricor Therapeutics," the "Company," "we," "us," "our" or similar terms include Capricor Therapeutics, Inc. and its wholly-owned subsidiary. References to "Capricor" are with respect to Capricor, Inc., our wholly-owned subsidiary.

Overview

Our mission is to develop first-in-class biological therapies for the treatment of diseases, with a focus on Duchenne muscular dystrophy, or DMD, and other rare disorders. Our executive offices are located at 8840 Wilshire Blvd., 2nd Floor, Beverly Hills, California 90211. Our telephone number is (310) 358-3200 and our Internet address is <u>www.capricor.com</u>.

Drug Candidates

Our Product Candidates

We currently have four drug candidates, two of which are in various stages of active development. Our current research and development efforts have been focused on CAP-1002 and CAP-2003. In 2018 we commenced enrollment of patients in a clinical trial of CAP-1002 in patients with DMD called HOPE-2. CAP-1002 was also the subject of three previous clinical trials conducted by us. Recently, we decided to end the long-term follow-up which had been ongoing in our previously completed trials. CAP-1002 is also currently being investigated in two additional trials sponsored by CSMC, which are the REGRESS trial investigating heart failure with preserved ejection fraction and the ALPHA trial investigating pulmonary arterial hypertension. Although, we are not the sponsor of these trials, we are providing the CAP-1002 investigational product for use in the trials. We are also evaluating CAP-2003 in pre-clinical studies for the treatment of various indications. CAP-1001 (autologous CDCs) was the subject of the CSMC and JHU-sponsored Phase I CADUCEUS trial and is not in active development. Both CAP-1002 and CAP-1001 are derived from cardiospheres, or CSps, and we do not plan to develop CSps as a therapeutic.

CAP-1002 for the Treatment of Duchenne Muscular Dystrophy:

Based on our understanding of the mechanism of action of CAP-1002 which has been seen in pre-clinical models of DMD, we believe that CAP-1002 has the potential to decrease inflammation and muscle degeneration while exerting positive effects on muscle regeneration, all of which may translate into patients retaining muscle function for a longer period of time. Data supporting peripheral intravenous route of administration of CAP-1002 in the DMD setting has been provided by pre-clinical mouse studies where CDCs, the active ingredient in CAP-1002, have been shown to increase exercise capacity and diaphragmatic function.

Phase II HOPE-2 Clinical Trial

HOPE-2 is a randomized, double-blind, placebo-controlled clinical trial which is being conducted at multiple sites located in the United States. Originally, HOPE-2 was designed as an 84 patient clinical trial, but we are pursuing a sample size re-estimation that will likely lead to a significant reduction in the number of DMD patients. To date, we have enrolled 20 patients in our HOPE-2 clinical trial. The clinical trial will evaluate the safety and efficacy of repeat, intravenous, or IV, doses of CAP-1002, in boys and young men with evidence of skeletal muscle impairment regardless of ambulatory status and on a stable regimen of systemic glucocorticoids. While there are many clinical initiatives in DMD, HOPE-2 is one of the very few to focus on non-ambulant patients. These boys and young men are looking to maintain what function they have in their arms and hands, and Capricor's previous study of a single intracoronary dose of CAP-1002 provided preliminary evidence of efficacy that CAP-1002 may be able to help DMD patients retain, or slow the loss of upper limb function.

After a patient in the HOPE-2 trial had a serious adverse event in the form of anaphylaxis, we put a voluntary hold on dosing in December 2018 to develop a plan to manage potential allergic reactions. The investigation suggests that the patient may have been allergic to something contained in the investigational product, including an excipient, or inactive ingredient, in the formulation. To reduce the risk of future events, we initiated a pre-medication strategy commonly used by physicians to prevent and treat allergic reactions. After an approximate one month period, the FDA and the Data and Safety Monitoring Board (DSMB) granted us permission to resume enrollment in the study.

In June 2017, we had a meeting with the FDA to discuss potential clinical endpoints that could be used for registration strategies for CAP-1002 in the DMD indication. The minutes of the meeting indicated the FDA's willingness to accept Capricor's proposal to use the Performance of the Upper Limb, or PUL, test as the basis for the primary efficacy endpoint for clinical studies in support of a Biologics License Application, or BLA. The PUL test is an outcomes instrument that was specifically designed to assess upper limb function in ambulant and non-ambulant patients with DMD. In December 2018, we met again with the FDA as part of the expedited review afforded under the <u>RMAT</u> designation. The FDA grants the RMAT designation to investigational regenerative medicine therapies intended to treat a serious condition and for which preliminary clinical evidence indicates a potential to address unmet medical needs for that condition. During the RMAT discussion, which was reflected in subsequent meeting minutes issued by the FDA, Capricor asked whether the FDA would agree if <u>HOPE-2</u> could serve as a registration study if the study provides evidence that CAP-1002 is safe and effective in treating Duchenne muscular dystrophy. The FDA advised Capricor to request an end of phase meeting after completion of the trial to determine whether HOPE-2 could serve as the registration study.

The FDA also reiterated its support for the use of the Performance of the Upper Limb (PUL) 2.0 mid-level test, or the PUL 2.0, which is described in more detail below, as the primary efficacy endpoint for HOPE-2. In addition, the agency stated that the trial would need to provide evidence of clinically meaningful changes in the PUL, as well as other evidence supportive of CAP-1002 efficacy for patients with advanced Duchenne muscular dystrophy, in order to potentially serve as a registration trial.

The primary efficacy endpoint will be the relative change in patients' abilities to perform manual tasks that relate to activities of daily living and are important to their quality of life. These abilities will be measured through the PUL test, and the HOPE-2 study will evaluate these through both PUL 1.2 and 2.0. HOPE-2 is focusing on the mid-level dimension of the PUL which assesses the ability to use muscles from the elbow to the fingers, which are essential for operating wheelchairs and performing other daily functions. In HOPE-2, additional secondary and exploratory endpoints such as cardiac function, pulmonary function testing, quality of life and additional measures are included.

Currently, with respect to the HOPE-2 trial, we are planning to conduct an interim analysis at the 6-month time-point as opposed to the originally designed 12-month time-point for certain of the 20 currently enrolled patients. In the second quarter, we are planning to pause additional subject visits pending the results of the interim analysis. Continuation of enrollment and completion of the study as originally designed is dependent on the outcome of the interim analysis and our ability to secure additional funding.

While the trial was originally planned to be conducted at approximately 10-15 investigative sites in the U.S., we recently decided to terminate several sites which had not yet recruited any patients. Other operational aspects of the trial are being assessed and potentially reduced in order to conserve resources and meet the operational needs of the trial as they are re-defined.

Phase I/II HOPE-Duchenne Clinical Trial

We have completed the randomized, controlled, multi-center Phase I/II HOPE-Duchenne clinical trial which was designed to evaluate the safety and exploratory efficacy of CAP-1002 in patients with cardiomyopathy associated with Duchenne muscular dystrophy, or DMD. Twenty-five patients were randomized in a 1:1 ratio to receive either CAP-1002 on top of usual care or usual care only. In patients receiving CAP-1002, 25 million cells were infused into each of their three main coronary arteries for a total dose of 75 million cells. It was a one-time treatment, and the last patient was infused in September 2016. Patients were observed over the course of 12 months. Efficacy was evaluated according to several exploratory outcome measures. This study was funded in part through a grant award, or the CIRM Award, from the California Institute for Regenerative Medicine, or CIRM. In January 2019, this study was published in the online issue of *Neurology*, the medical journal of the American Academy of Neurology.

We commenced the HOPE-Duchenne trial in February 2016 and completed enrollment in September 2016. In April 2017, we reported positive top-line results from a pre-specified six-month interim analysis of this study, which showed that CAP-1002 was generally safe and well-tolerated over the initial six-month follow-up period. The six-month results were presented at the 22nd Annual International Congress of the World Muscle Society in October 2017.

In exploratory efficacy analyses, observed changes from baseline to Month 6 significantly differed by treatment group for systolic thickening of the inferior wall of the heart as measured by MRI (p=0.03). In a post-hoc analysis of function of the mid- and distal-level upper limb in which a responder was defined as a patient who demonstrated a 10% improvement from baseline in score on the PUL test, CAP-1002 patients were more likely to be responders than patients in usual care (p=0.045) at Week 6. In addition, numerical results in some other cardiac and skeletal muscle measures, including cardiac scar (p=0.09), were consistent with a treatment effect although differences between treatment groups were not statistically significant. The observed clinical results appear to generally corroborate a large body of pre-clinical data from studies in DMD animal models.

We reported our 12-month data from the Hope-Duchenne trial at a Late-Breaking Science session of the American Heart Association Scientific Sessions 2017. As shoulder function had already been lost in most of the HOPE participants, investigators used the combined mid-distal PUL subscales to assess changes in skeletal muscle function and found significant improvement in those treated with CAP-1002 in a defined post-hoc analysis. Among the lower-functioning patients, defined as patients with a baseline mid-distal PUL score < 55 out of 58, investigators reported sustained or improved motor function at 12 months in 8 of 9 (89%) patients treated with CAP-1002 as compared to none (0%) of the usual care participants (p=0.007).

To assess cardiac structure and function, investigators used magnetic resonance imaging, or MRI. They found significant improvements in systolic thickening of the left ventricular wall among those patients treated with CAP-1002. Systolic wall thickening is the component of myocardial contraction ultimately responsible for ejection of blood from the left ventricle. Preservation or enhancement of systolic wall thickening may potentially be the result of the reversal of fibrosis.

In the inferior wall, they recorded a mean (SD) 31.2% (47.0%) increase in thickening six months after treatment and a mean 25.8% (46.7%) increase in thickening 12 months after treatment. In comparison, the usual care group showed a mean 8.8% (27.7%) decrease at six months and a mean 1.6% (37.9%) increase at 12 months in the systolic thickening of the inferior wall. The difference between the groups in absolute change from baseline to six months achieved statistical significance (p=0.04) and trended in favor of CAP-1002 treatment group (p=0.09) from baseline to 12 months.

Investigators also found that scarring of the heart muscle among those treated with CAP-1002 decreased relative to the control group. Progressive cardiac scarring eventually impairs the heart's pumping ability and is currently the leading cause of death in Duchenne muscular dystrophy. At the 12-month follow-up, those treated with CAP-1002 had a mean (SD) 7.1% (10.3%) reduction in scar size, in contrast to a mean 4.8% (22.3%) increase in scar size in the usual care group, a difference that achieved statistical significance using non-parametric analysis to account for outliers (p=0.03).

CAP-1002 was generally safe and well-tolerated in the HOPE-Duchenne trial. There was no significant difference in the incidence of treatment-emergent adverse events in either group. There were no early study discontinuations due to adverse events.

Additionally, in 2018 we conducted an open-label extension of the Hope-Duchenne trial, or HOPE-OLE, where 8 patients who were randomized into the control group of the HOPE-Duchenne trial were given two doses of CAP-1002. We have completed enrollment and treatment of the patients in the HOPE-OLE trial. In January 2019, we entered into an Amendment to the CIRM Notice of Award pursuant to which CIRM allowed us to use excess funds from our grant award to fund, in part, certain activities associated with HOPE-OLE.

Regulatory Designations for CAP-1002 for the treatment of DMD

In April 2015, the FDA granted Orphan Drug Designation to CAP-1002 for the treatment of DMD. Orphan Drug Designation is granted by the FDA's Office of Orphan Drug Products to drugs intended to treat a rare disease or condition affecting fewer than 200,000 people in the United States or a disease or condition that affects more than 200,000 people in the United States and for which there is no reasonable expectation that the cost of developing and making available in the United States a drug for this type of disease or condition will be recovered from sales in the United States for that drug. This designation confers special incentives to the drug developer, including tax credits on the clinical development costs and prescription drug user fee waivers and may allow for a seven-year period of market exclusivity in the United States upon FDA approval.

In July 2017, the FDA granted Rare Pediatric Disease Designation to CAP-1002 for the treatment of DMD. The FDA defines a "rare pediatric disease" as a serious or life-threatening disease affecting individuals primarily aged from birth to 18 years and that affects fewer than 200,000 individuals in the United States. Under the FDA's Rare Pediatric Disease Priority Review Voucher program, upon the approval of a qualifying New Drug Application, or NDA, or BLA for the treatment of a rare pediatric disease, the sponsor of such application would be eligible for a Rare Pediatric Disease Priority Review Voucher that can be used to obtain priority review for a subsequent NDA or BLA. The Priority Review Voucher may be sold or transferred an unlimited number of times.

In February 2018, we were notified by the FDA Office of Tissues and Advanced Therapies, that we were granted the Regenerative Medicine Advanced Therapy, or RMAT, designation for CAP-1002 for the treatment of DMD. The FDA grants the RMAT designation to regenerative medicine therapies intended to treat a serious condition and for which preliminary clinical evidence indicates a potential to address unmet medical needs for that condition. The RMAT designation makes therapies eligible for the same actions to expedite the development and review of a marketing application that are available to drugs that receive breakthrough therapy designation – including increased meeting opportunities, early interactions to discuss any potential surrogate or intermediate endpoints and the potential to support accelerated approval. CAP-1002 is one of the few therapies currently in development to help non-ambulant patients with Duchenne muscular dystrophy. To receive the RMAT designation, we submitted data from the HOPE-Duchenne Trial.

CAP-1002 for the Treatment of Cardiac Conditions:

In previous years, we completed several trials investigating the use of CAP-1002 for the treatment of various cardiac conditions, including heart failure (the DYNAMIC Trial) and post MI with cardiac dysfunction (ALLSTAR). Because of our decision to focus our efforts on DMD, we have decided not to pursue those indications at this time, nor do we have any plans to continue with the development of these programs. We expect no further material expenses in connection with these programs.

Investigator Sponsored Clinical Trials

Capricor has agreed to provide cells for investigational purposes in two clinical trials sponsored by CSMC. These cells were developed as part of the Company's past research and development efforts. The first trial is known as "Regression of Fibrosis and Reversal of Diastolic Dysfunction in HFpEF Patients Treated with Allogeneic CDCs." Dr. Eduardo Marbán is the named principal investigator under the study. The second trial is known as "Pulmonary Arterial Hypertension treated with Cardiosphere-derived Allogeneic Stem Cells." In both studies, Capricor is providing the necessary number of doses of cells and will receive a negotiated amount of monetary compensation which is estimated to be approximately \$2.1 million over several years.

CAP-2003:

Extracellular vesicles ("EVs"), including exosomes and microvesicles are nano-scale, membrane-enclosed vesicles, that are secreted by cells and contain characteristic lipids, proteins and RNA molecules, such as microRNAs. EVs act as messengers to regulate the functions of neighboring cells, and pre-clinical research has shown that exogenously-administered exosomes can direct or, in some cases, re-direct cellular activity, supporting their therapeutic potential agents or delivery vehicles. Their size, ease of crossing cell membranes, and ability to communicate in native cellular language makes them an exciting class of potential therapeutic agents.

CAP-2003 is comprised of exosomes secreted by CDCs which are shown to mediate many of the effects that are observed with the CDCs, including anti-inflammatory, pro-angiogenic, anti-apoptotic, and anti-fibrotic effects. We are currently conducting studies in pre-clinical models of various conditions to explore the possible therapeutic benefits that CAP-2003 may possess. It is unknown at this time when an IND will be submitted for any particular indication. Additionally, in pre-clinical studies, we are exploring the use of CAP-2003 as a potential vehicle for delivering therapies to targeted tissues in the human body.

In July 2018, we entered into a Cooperative Research and Development Agreement with the U.S. Army Institute of Surgical Research pursuant to which the parties agreed to cooperate in research and development on the evaluation of CAP-2003 for the treatment of trauma related injuries and conditions, which are now the third leading cause of death in the U.S. At this time, we are considering various strategic options with respect to this program.

Inactive or Discontinued Product Candidates

CAP-1001:

CAP-1001 consists of autologous CDCs. This product candidate was evaluated in the randomized, double-blind, placebo-controlled Phase I CADUCEUS clinical trial in patients who had recently experienced an MI. The study was sponsored and conducted by CSMC in collaboration with JHU. At present, there is no plan for another clinical trial for CAP-1001.

CSps:

CSps are a 3D micro-tissue from which CDCs are derived, and have shown significant healing effects in pre-clinical models of heart failure. At present there is no plan to develop CSps as a therapeutic agent.

Financial Operations Overview

We have no commercial product sales to date and will not have the ability to generate any commercial product revenue until after we have received approval from the FDA or equivalent foreign regulatory bodies to begin selling our pharmaceutical product candidates. Developing pharmaceutical products is a lengthy and very expensive process. Even if we obtain the capital necessary to continue the development of our product candidates, whether through a strategic transaction or otherwise, we do not expect to complete the development of a product candidate for several years, if ever. To date, most of our development expenses have related to our product candidates, consisting of CAP-1002, CAP-2003 and our former product candidate, Cenderitide. As we proceed with the clinical development of CAP-1002, and as we further develop CAP-2003 and other additional products, our expenses will further increase. Accordingly, our success depends not only on the safety and efficacy of our product candidates, but also on our ability to finance the development of the products and our clinical programs. Our major sources of working capital to date have been proceeds from private and public equity and clinical programs, we continue to explore financing and other strategic alternatives with respect to the Company as well as one or more of our product candidates.

Research and development, or R&D, expenses consist primarily of salaries and related personnel costs, supplies, clinical trial costs, patient treatment costs, rent for laboratories and manufacturing facilities, consulting fees, costs of personnel and supplies for manufacturing, costs of service providers for pre-clinical, clinical and manufacturing, and certain legal expenses resulting from intellectual property prosecution, stock compensation expense and other expenses relating to the design, development, testing and enhancement of our product candidates. Except for certain capitalized intangible assets, R&D costs are expensed as incurred.

General and administrative, or G&A, expenses consist primarily of salaries and related expenses for executive, finance and other administrative personnel, stock compensation expense, accounting, legal and other professional fees, consulting expenses, rent for corporate offices, business insurance and other corporate expenses.

Our results have included non-cash compensation expense due to the issuance of stock options and warrants, as applicable. We expense the fair value of stock options and warrants over their vesting period as applicable. When more precise pricing data is unavailable, we determine the fair value of stock options using the Black-Scholes option-pricing model. The terms and vesting schedules for share-based awards vary by type of grant and the employment status of the grantee. Generally, the awards vest based upon time-based or performance-based conditions. Performance-based conditions generally include the attainment of goals related to our financial performance and product development. Stock-based compensation expense is included in the consolidated statements of operations under G&A or R&D expenses, as applicable. We expect to record additional non-cash compensation expense in the future, which may be significant.

Results of Operations

Revenue

Grant Income. Grant income for the three months ended March 31, 2019 and 2018 was approximately \$0.1 million and \$0.3 million, respectively. The decrease in grant income of approximately \$0.2 million in the first quarter of 2019 as compared to the first quarter of 2018 is primarily due to the timing of grant activities.

Miscellaneous Income. Miscellaneous income for both of the three month periods ended March 31, 2019 and 2018 was approximately \$0.1 million. The miscellaneous income was related to providing cells for investigational purposes for clinical trials sponsored by CSMC, which began in the third quarter of 2017.

Operating Expenses

General and Administrative Expenses. G&A expenses for the three months ended March 31, 2019 and 2018 were approximately \$1.0 million and \$1.4 million, respectively. The decrease of approximately \$0.4 million in G&A expenses in the first quarter of 2019 compared to the same period of 2018 is primarily attributable to a decrease in headcount reducing salaries along with a reduction of investor relations services and stock based compensation expense.

Research and Development Expenses. R&D expenses for the three months ended March 31, 2019 and 2018 were approximately \$1.8 million and \$2.7 million, respectively. The decrease of approximately \$0.9 million in R&D expenses in the first quarter of 2019 compared to the same period of 2018 is primarily due to the timing of clinical development activities of CAP-1002 (HOPE-Duchenne, HOPE-2 and HOPE-OLE clinical trials). These activities resulted in a decrease of approximately \$0.6 million. Furthermore, there was a decrease of approximately \$0.2 million in research and development expenses related to CAP-1002 and CAP-2003 for the three months ended March 31, 2019 as compared to the same period in 2018. Additionally, there was a decrease of \$0.1 million in stock based compensation expense in the first quarter of 2019 as compared to the same period of 2018.

Products Under Active Development

CAP-1002 – CAP-1002 is in its developmental stages. We expect to spend approximately \$3.0 million to \$5.0 million during 2019 on the clinical development of CAP-1002, which expenses are primarily related to our HOPE-2 clinical trial. These figures are largely dependent on whether or not we reinitiate enrollment in the HOPE-2 trial. That determination will depend on the results of our planned interim analysis and our ability to secure additional funding.

CAP-2003 – We expect to spend approximately \$0.5 million to \$1.5 million during 2019 on pre-clinical and other research expenses related to the CAP-2003 program, a portion of which will be offset by our grant award from the DoD. Capricor is currently engaged in pre-clinical testing of CAP-2003 to explore its therapeutic potential, including studies that could potentially enable an IND. We have received a grant from the DoD for up to approximately \$2.4 million to be used towards the development of a scalable, commercially-ready process to manufacture CAP-2003. As of March 31, 2019, the Company has approximately \$0.6 million available under this grant award, pursuant to the terms of the award.

Products Not Under Active Development

CAP-1001 – In 2011, CSMC, in collaboration with JHU, completed the Phase I CADUCEUS trial. This study enrolled 25 patients who had suffered a heart attack within a mean of 65 days. Seventeen patients received CAP-1001 and eight received standard of care. Twelve months after the study had completed, no measurable adverse effects occurred in the 17 patients who were treated with CAP-1001. 16 of the 17 treated patients showed a mean reduction of approximately 45% in scar mass and an increase in viable heart muscle one-year post heart attack. The eight patients in the control group had no significant change in scar size. At present, there is no plan for an additional clinical trial of CAP-1001.

CSps – CSps are at the pre-clinical stage of development. At present, there is no plan for a clinical trial of CSps.

Our expenditures on current and future clinical development programs, particularly our CAP-1002 and CAP-2003 programs cannot be predicted with any significant degree of certainty as they are dependent on the results of our current trials and our ability to secure additional funding. Further, we cannot predict with any significant degree of certainty the amount of time which will be required to complete our clinical trials, the costs of completing research and development projects or whether, when and to what extent we will generate revenues from the commercialization and sale of any of our product candidates. The duration and cost of clinical trials may vary significantly over the life of a project as a result of unanticipated events arising during manufacturing and clinical development and as a result of a variety of other factors, including:

- the number of trials and studies in a clinical program;
- the number of patients who participate in the trials;
- the number of sites included in the trials;
- the rates of patient recruitment and enrollment;
- the duration of patient treatment and follow-up;
- the costs of manufacturing our product candidates; and
- · the costs, requirements and timing of, and the ability to secure, regulatory approvals.

Liquidity and Capital Resources

The following table summarizes our liquidity and capital resources as of March 31, 2019 and December 31, 2018 and our net increase in cash and cash equivalents for the three months ended March 31, 2019 and 2018, and is intended to supplement the more detailed discussion that follows. The amounts stated in the tables below are expressed in thousands.

Liquidity and capital resources	Mar	ch 31, 2019	Decer	nber 31, 2018
Cash and cash equivalents	\$	7,170	\$	4,259
Working capital	\$	6,403	\$	7,216
Stockholders' equity	\$	3,740	\$	4,616
Cash flow data	Three months ended March 31, 2019 2018			
Cash provided by (used in):				
Operating activities	\$	(1,608)	\$	(3,418)
Investing activities		2,985		1,812
Financing activities		1,433		2,513
Net increase in cash and cash equivalents	\$	2,810	\$	907

Our total cash and cash equivalents, not including restricted cash, as of March 31, 2019 was approximately \$7.2 million compared to approximately \$4.3 million as of December 31, 2018. The increase in cash and cash equivalents from December 31, 2018 as compared to March 31, 2019 is due to a reallocation of marketable securities to cash and cash equivalents of \$3.0 million along with the net proceeds from the sale of common stock during the first quarter of 2019. Total marketable securities, consisting primarily of U.S. treasuries, were zero as of March 31, 2019, as compared to approximately \$3.0 million as of December 31, 2018. As of March 31, 2019, we had approximately \$4.9 million in total liabilities. As of March 31, 2019, we had approximately \$6.4 million in net working capital. We had a net loss of approximately \$2.5 million for the three months ended March 31, 2019.

Cash used in operating activities was approximately \$1.6 million and \$3.4 million for the three months ended March 31, 2019 and 2018, respectively. The difference of approximately \$1.8 million in cash from operating activities is primarily due to a change of approximately \$0.4 million in accounts payable and accrued liabilities and a change of \$0.3 million in prepaid expenses and other current assets for the three months ended March 31, 2019 as compared to the same period in 2018. Furthermore, there was a decrease of \$1.2 million in net loss for the three months ended March 31, 2019 as compared to the same period in 2018. Furthermore, there was a decrease of \$1.2 million are able to continue developing our product candidates, including if we expand our technology portfolio, engage in further research and development activities, and, in particular, conduct pre-clinical studies and clinical trials, we expect to continue incurring substantial losses, which will generate negative net cash flows from operating activities.

We had cash flow provided by investing activities of approximately \$3.0 million and \$1.8 million for the three months ended March 31, 2019 and 2018, respectively. The increase in cash provided by investing activities for the three months ended March 31, 2019 as compared to the same period of 2018 is primarily due to the net effect from purchases, sales, and maturities of marketable securities.

We had cash flow provided by financing activities of approximately \$1.4 million and \$2.5 million for the three months ended March 31, 2019 and 2018, respectively. The decrease in cash provided by financing activities for the three months ended March 31, 2019 as compared to the same period of 2018 is primarily due to the net proceeds from the sale of common stock.

From inception through March 31, 2019, we financed our operations primarily through private and public sales of our equity securities, NIH and DoD grants, a payment from Janssen Biotech, Inc., in connection with a Collaboration Agreement, a CIRM loan and a CIRM grant award. Our recurring losses from operations raise substantial doubt about our ability to continue as a going concern. As we have not generated any revenue from the commercial sale of our products to date, and we do not expect to generate revenue for several years, if ever, we will need to raise substantial additional capital in order to fund our immediate general corporate activities and, thereafter, to fund our research and development, including our long-term plans for clinical trials and new product development. We expect that if we are unable to raise additional capital, our current cash on hand will not be able to fund operations for a period of 12 months or more. We may seek to raise additional funds through various potential sources, such as equity and debt financings, or through strategic collaborations and license agreements. We can give no assurances that we will be able to secure such additional sources of funds to support our operational funds by issuing equity securities, our stockholders may experience significant dilution, and debt financing, if available, may involve restrictive covenants. To the extent that we raise additional funds through collaboration and licensing arrangements, it may be necessary to relinquish some rights to our technologies or our product candidates or grant licenses on terms that may not be favorable to us.

Our estimates regarding the sufficiency of our financial resources are based on assumptions that may prove to be wrong. We may need to obtain additional funds sooner than planned or in greater amounts than we currently anticipate. The actual amount of funds we will need to operate is subject to many factors, some of which are beyond our control. These factors include the following:

- · the progress of our research activities;
- the number and scope of our research programs;
- · the progress and success of our pre-clinical and clinical development activities;
- the progress of the development efforts of parties with whom we have entered into research and development agreements;
- · the costs of manufacturing our product candidates;
- · our ability to maintain current research and development programs and to establish new research and development and licensing arrangements;
- · the costs involved in prosecuting and enforcing patent claims and other intellectual property rights; and
- the costs and timing of regulatory approvals.

Financing Activities by the Company

Common Stock Sales Agreement. On October 19, 2017, the Company entered into a Common Stock Sales Agreement, or the Sales Agreement, with H.C. Wainwright & Co. LLC, or Wainwright, under which we may, from time to time, issue and sell shares of our common stock through Wainwright as sales agent in an at-the-market offering under a prospectus supplement for aggregate sales proceeds of up to \$14.0 million, or the ATM Program. The common stock will be distributed at the market prices prevailing at the time of sale. The Sales Agreement provided that Wainwright would be entitled to compensation for its services at a commission rate of 3.0% of the gross sales price per share of common stock sold. All shares issued pursuant to the ATM Program were issued pursuant to our shelf registration statement on Form S-3 (File No. 333-207149), which was initially filed with the SEC on September 28, 2015 and declared effective by the SEC on October 26, 2015. As of the expiration of the ATM Program on April 23, 2019, the Company has sold an aggregate of 8,992,331 common shares at an average price of approximately \$1.30 per common share for net proceeds of approximately \$11.4 million.

Financing Activities by Capricor, Inc.

CIRM Grant Award

On June 16, 2016, Capricor entered into the CIRM Award with CIRM in the amount of approximately \$3.4 million to fund, in part, Capricor's Phase I/II HOPE-Duchenne clinical trial investigating CAP-1002 for the treatment of Duchenne muscular dystrophy-associated cardiomyopathy. Pursuant to terms of the CIRM Award, the disbursements were tied to the achievement of specified operational milestones. If CIRM determines, in its sole discretion, that Capricor has not complied with the terms and conditions of the CIRM Award, CIRM may suspend or permanently cease disbursements or pursue other remedies as allowed by law. In addition, the terms of the CIRM Award include a co-funding requirement pursuant to which Capricor is required to spend approximately \$2.3 million of its own capital to fund the CIRM funded research project. If Capricor fails to satisfy its co-funding requirement, the amount of the CIRM Award may be proportionately reduced. The CIRM Award is further subject to the conditions and requirements set forth in the CIRM Grants Administration Policy for Clinical Stage Projects. Such requirements include, without limitation, the filing of quarterly annual reports with CIRM, the sharing of intellectual property pursuant to Title 17, California Code of Regulations (CCR) Sections 100600-100612, and the sharing with the State of California of a fraction of licensing revenue received from a CIRM funded research project and net commercial revenue from a commercialized product which resulted from the CIRM funded research as set forth in Title 17, CCR Section 100608. The maximum royalty on net commercial revenue that Capricor may be required to pay to CIRM is equal to nine times the total amount awarded and paid to Capricor.

After completing the CIRM funded research project and after the award period end date, estimated to be in 2019, Capricor has the right to convert the CIRM Award into a loan, the terms of which will be determined based on various factors, including the stage of the research and development of the program at the time the election is made. On June 20, 2016, Capricor entered into a Loan Election Agreement with CIRM whereby, among other things, CIRM and Capricor agreed that if Capricor elects to convert the grant into a loan, the term of the loan would be five years from the date of execution of the applicable loan agreement; provided that the term of the loan will not exceed ten years from the date on which the CIRM Award was granted. Beginning on the date of the loan, the loan shall bear interest on the unpaid principal balance, plus the interest that has accrued prior to the election point according to the terms set forth in CIRM's Loan Policy (the "New Loan Balance"), at a per annum rate equal to the LIBOR rate for a three-month deposit in U.S. dollars, as published by the Wall Street Journal on the loan date, plus one percent. Interest shall be compounded annually on the outstanding New Loan Balance commencing with the loan date and the interest shall be payable, together with the New Loan Balance, upon the due date of the loan. If Capricor elects to convert the CIRM Award into a loan, cretain requirements of the CIRM Award will no longer be applicable, including the revenue sharing requirements. Capricor has not yet made its decision as to whether it will elect to convert the CIRM Award will no longer.

In 2016, Capricor received \$3.1 million under the terms of the CIRM Award. In September 2017, the Company completed the second operational milestone tied to the last patient completing one year of follow-up, for which approximately \$0.3 million was received by Capricor in November 2017. As of March 31, 2019, the Company's liability balance for the CIRM Award was \$3.4 million, of which approximately \$0.2 million is recorded as restricted cash, due to the fact that Capricor is required to expend approved project costs in order to use these funds.

On August 8, 2017, we entered into an Amendment to the CIRM Notice of Award pursuant to which CIRM approved the Company's request to use the remaining estimated project funds of the CIRM Award for technology transfer activities in support of the manufacture of CAP-1002 to a designated contract manufacturing organization, or CMO, which will help enable Capricor to offer access to CAP-1002 to patients from the control arm of the HOPE-Duchenne trial via an open-label extension protocol. On September 7, 2018, we entered into an Amendment to the CIRM Notice of Award pursuant to which CIRM added an additional operational milestone which would be satisfied by completion of certain activities related to technology transfer. On January 23, 2019, we entered into an Amendment to the CIRM Notice of Award pursuant to which CIRM added an additional operational milestone which would be satisfied by completion of certain activities related to the tothe CIRM added an additional operational milestone which would be satisfied by completion of certain activities related to the tothe CIRM added an additional operational milestone which would be satisfied by completion of certain activities related to the tothe CIRM added an additional operational milestone which would be satisfied by completion of certain activities related to the HOPE-OLE clinical trial.

NIH Grant Award (HLHS)

In September 2016, Capricor was approved for a grant from the NIH to study CAP-2003 for HLHS. Under the terms of the NIH grant, disbursements will be made to Capricor in an amount up to approximately \$4.2 million, subject to annual and quarterly reporting requirements as well as completion of the study objectives. As of March 31, 2019, approximately \$0.7 million has been incurred under the terms of the NIH grant award. At this time, the Company is in the process of closing out this grant award, subject to completing customary close-out documentation with no additional expenses expected to be incurred.

U.S. Department of Defense Grant Award

In September 2016, Capricor was approved for a grant award from the DoD in the amount of approximately \$2.4 million to be used toward developing a scalable, commercially-ready process to manufacture CAP-2003. Under the terms of the award, disbursements will be made to Capricor over a period of approximately three years, subject to annual and quarterly reporting requirements. As of March 31, 2019, approximately \$1.8 million has been incurred under the terms of the award.

Contractual Obligations and Commitments

We are a smaller reporting company, as defined by Rule 12b-2 of the Securities Exchange Act of 1934, as amended, and are not required to provide the information required under this item.

Off-Balance Sheet Arrangements

There were no off-balance sheet arrangements as described by Item 303(a)(4) of Regulation S-K as of March 31, 2019.

Critical Accounting Policies and Estimates

Our financial statements are prepared in accordance with generally accepted accounting principles. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses and related disclosures. We evaluate our estimates and assumptions on an ongoing basis, including research and development and clinical trial accruals, and stock-based compensation estimates. Our estimates are based on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Our actual results could differ from these estimates. We believe the following critical accounting policies reflect the more significant judgments and estimates used in the preparation of our financial statements and accompanying notes.

Revenue Recognition

For contracts completed as of December 31, 2017, revenue was recognized in accordance with ASC 605 and other standards which have been superseded for subsequent fiscal years. The Company applied ASU 606 using the modified retrospective approach for all contracts in process as of January 1, 2018.

Grant Income

The determination as to when income is earned is dependent on the language in each specific grant. Generally, we recognize grant income in the period in which the expense is incurred for those expenses that are deemed reimbursable under the terms of the grant. Grant income is due upon submission of reimbursement request. The transaction price varies for grant income based on the expenses incurred under the awards.

Miscellaneous Income

Revenue is recognized in connection with the delivery of doses which were developed as part of our past R&D efforts. Income is recorded when the Company has satisfied the obligations as identified in the contracts with the customer. Miscellaneous income is due upon billing. Miscellaneous income is based on contracts with fixed transaction prices.

CIRM Grant Award

Capricor accounts for the disbursements under its CIRM Award as long-term liabilities. Capricor recognizes the CIRM grant disbursements as a liability as the principal is disbursed rather than recognizing the full amount of the grant award. After completing the CIRM funded research project and after the award period end date, Capricor has the right to convert the CIRM Award into a loan, the terms of which will be determined based on various factors, including the stage of the research and the stage of development at the time the election is made. Since Capricor may be required to repay some or all of the amounts awarded by CIRM, the Company accounts for this award as a liability rather than income.

Research and Development Expenses and Accruals

R&D expenses consist primarily of salaries and related personnel costs, supplies, clinical trial costs, patient treatment costs, rent for laboratories and manufacturing facilities, consulting fees, costs of personnel and supplies for manufacturing, costs of service providers for pre-clinical, clinical and manufacturing, and certain legal expenses resulting from intellectual property prosecution, stock compensation expense and other expenses relating to the design, development, testing and enhancement of our product candidates. Except for certain capitalized intangible assets, R&D costs are expensed as incurred.

Our cost accruals for clinical trials and other R&D activities are based on estimates of the services received and efforts expended pursuant to contracts with numerous clinical trial centers and contract research organizations, or CROs, clinical study sites, laboratories, consultants or other clinical trial vendors that perform activities in connection with a trial. Related contracts vary significantly in length and may be for a fixed amount, a variable amount based on actual costs incurred, capped at a certain limit, or for a combination of fixed, variable and capped amounts. Activity levels are monitored through close communication with the CROs and other clinical trial vendors, including detailed invoice and task completion review, analysis of expenses against budgeted amounts, analysis of work performed against approved contract budgets and payment schedules, and recognition of any changes in scope of the services to be performed. Certain CRO and significant clinical trial vendors provide an estimate of costs incurred but not invoiced at the end of each quarter for each individual trial. These estimates are reviewed and discussed with the CRO or vendor as necessary, and are included in R&D expenses for the related period. For clinical study sites which are paid periodically on a per-subject basis to the institutions performing the clinical study, we accrue an estimated amount based on subject screening and enrollment in each quarter. All estimates may differ significantly from the actual amount subsequently invoiced, which may occur several months after the related services were performed.

In the normal course of business, we contract with third parties to perform various R&D activities in the on-going development of our product candidates. The financial terms of these agreements are subject to negotiation, vary from contract to contract and may result in uneven payment flows. Payments under the contracts depend on factors such as the achievement of certain events, the successful enrollment of patients, and the completion of portions of the clinical trial or similar conditions. The objective of the accural policy is to match the recording of expenses in the financial statements to the actual services received and efforts expended. As such, expense accruals related to clinical trials and other R&D activities are recognized based on our estimates of the degree of completion of the event or events specified in the applicable contract.

No adjustments for material changes in estimates have been recognized in any period presented.

Stock-Based Compensation

Our results include non-cash compensation expense as a result of the issuance of stock, stock options and warrants, as applicable. We have issued stock options to employees, directors and consultants under our three stock option plans: (i) the 2006 Stock Option Plan, (ii) the 2012 Restated Equity Incentive Plan (which superseded the 2006 Stock Option Plan), and (iii) the 2012 Non-Employee Director Stock Option Plan.

We expense the fair value of stock-based compensation over the vesting period. When more precise pricing data is unavailable, we determine the fair value of stock options using the Black-Scholes option-pricing model. This valuation model requires us to make assumptions and judgments about the variables used in the calculation. These variables and assumptions include the weighted-average period of time that the options granted are expected to be outstanding, the volatility of our common stock, the risk-free interest rate and the estimated rate of forfeitures of unvested stock options.

Stock options or other equity instruments to non-employees (including consultants) issued as consideration for goods or services received by us are accounted for based on the fair value of the equity instruments issued. The fair value of stock options is determined using the Black-Scholes option-pricing model. Historically, the Company periodically re-measured the fair value for non-qualified option grants recording an expense over the applicable vesting periods. However, in the third quarter of 2018, the Company early adopted ASU 2018-07. The Company calculates the fair value for non-qualified options as of the date of grant and expenses over the applicable vesting periods.

The terms and vesting schedules for share-based awards vary by type of grant and the employment status of the grantee. Generally, the awards vest based upon timebased or performance-based conditions. Performance-based conditions generally include the attainment of goals related to our financial and development performance. Stockbased compensation expense is included in general and administrative expense or research and development expense, as applicable, in the Statements of Operations and Comprehensive Income (Loss). We expect to record additional non-cash compensation expense in the future, which may be significant.

Restricted Cash

Restricted cash represents funds received under the CIRM Award. Restricted cash funds are to be allocated to the research costs as incurred. Generally, a reduction of restricted cash occurs when the Company deems certain costs are attributable to the respective award.

Recently Issued or Newly Adopted Accounting Pronouncements

In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)* ("ASU 2016-02"), which supersedes existing guidance on accounting for leases in *Leases (Topic 840)* and issued additional clarification throughout 2018. Under the new guidance, a lesse should recognize assets and liabilities that arise from its leases and disclose qualitative and quantitative information about its leasing arrangements. The Company elected the optional transition method to apply the standard as of January 1, 2019 as the effective date and therefore, did not apply the standard to comparative periods. The Company did not apply the recognition requirements to short-term leases and recognized those lease payments in the Consolidated Statements of Operations on a straight-line basis over the lease term. The Company also elected the available package of practical expedients in transition which allowed us to not re-assess whether existing or expired arrangements contain a lease, the lease classification of existing or expired leases, or whether previous initial direct costs would qualify for capitalization under the new lease standard. The adoption of this update did not have a material impact on the Company's financial statements.

In June 2018, the FASB issued ASU 2018-07, Compensation – Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting, which simplifies several aspects of the accounting for nonemployee share-based payment transactions resulting from expanding the scope of Topic 718 to include share-based payment transactions for acquiring goods and services from nonemployees. The Company early adopted ASU 2018-07 and all subsequent updates related to this topic on a prospective basis effective July 1, 2018. The adoption of this update did not have a material impact on the Company's financial statements.

In November 2018, the FASB issued ASU 2018-18, Collaborative Arrangements (Topic 808): clarifying the interaction between Topic 808 and Topic 606. The amendments in the update clarifies that certain transactions between collaborative arrangement participants should be accounted for as revenue under Topic 606 when the collaborative arrangement participant is a customer in the context of a unit of account; adds unit-of-account guidance in Topic 808 to align with the guidance in Topic 606 when an entity is assessing whether the collaborative arrangement or a party of the arrangement is within the scope of Topic 606; requires that in a transaction with a collaborative arrangement participant that is not directly related to sales to third parties, presenting the transaction together with revenue recognized under Topic 606 is precluded if the collaborative arrangement participant is not a customer. The amendments for this update are effective for fiscal years beginning after December 15, 2019, and interim periods within those fiscal years. Early adoption is permitted. The Company is currently evaluating the impact of the new guidance on our consolidated financial statements.

Other recent accounting pronouncements issued by the FASB, including its Emerging Issues Task Force, the American Institute of Certified Public Accountants, and the SEC, did not or are not believed by management to have a material impact on the Company's present or future consolidated financial statement presentation or disclosures.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Interest Rate Sensitivity

Our exposure to market risk for changes in interest rates relates primarily to our marketable securities and cash and cash equivalents. As of March 31, 2019, the fair value of our cash, cash equivalents, including restricted cash, was approximately \$7.4 million. Additionally, as of March 31, 2019, Capricor's portfolio was classified as cash and cash equivalents, which consisted primarily of money market funds and bank money market, which included short term U.S. treasuries, bank savings and checking accounts.

The goal of our investment policy is to place our investments with highly rated credit issuers and limit the amount of credit exposure. We seek to improve the safety and likelihood of preservation of our invested funds by limiting default risk and market risk. Our investments may be exposed to market risk due to fluctuation in interest rates, which may affect our interest income and the fair market value of our investments, if any. We will manage this exposure by performing ongoing evaluations of our investments. Due to the short-term maturities, if any, of our investments to date, their carrying value has always approximated their fair value. Our policy is to mitigate default risk by investing in high credit quality securities, and we currently do not hedge interest rate exposure. Due to our policy of making investments in U.S. treasury securities with primarily short-term maturities, we believe that the fair value of our investment portfolio would not be significantly impacted by a hypothetical 100 basis point increase or decrease in interest rates.

Item 4. Controls and Procedures.

We have adopted and maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that controls and procedures, no matter how well designed and operated, cannot provide absolute assurance of achieving the desired control objectives.

As required by Rules 13a-15(b) and 15d-15(b) of the Securities Exchange Act of 1934, as amended, we carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Controls over Financial Reporting

There has been no change in our internal control over financial reporting during the quarter ended March 31, 2019 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

We are not involved in any material pending legal proceedings and are not aware of any material threatened legal proceedings against us.

Item 1A. Risk Factors.

There have been no material changes in our risk factors from those previously disclosed in Part 1, Item 1A, "Risk Factors," of our Annual Report on Form 10-K for the year ended December 31, 2018, as filed with the Securities and Exchange Commission, or the SEC, on March 29, 2019, and as amended by our Amendment No. 1 to Annual Report on Form 10-K/A filed with the SEC on April 1, 2019.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Not applicable.

* Filed herewith.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

	CAPRICOR THERAPEUTICS, INC.
Date: May 14, 2019	By: /s/ Linda Marbán, Ph.D. Linda Marbán, Ph.D. Chief Executive Officer (Principal Executive Officer)
Date: May 14, 2019	By: /s/ Anthony J. Bergmann Anthony J. Bergmann Chief Financial Officer (Principal Financial and Accounting Officer)

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

I, Linda Marbán, Ph.D., certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Capricor Therapeutics, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
